屏東縣 104 學年度國民小學暨幼兒園教師(含代理教師)聯合甄選試題

科目:英語專門知能測驗

說明:本試卷共50題,均為單選題。每題2分,共100分。

I. Vocabulary (60%; 2%	each): Choose the corr	ect answer.	
1. Scientists suggest that 1	people with a/an	diet are more unlik	xely to develop cancer.
(A) geminate	(B) gluttonous	(C) extemporaneous	(D) abstemious
2. Wearing red coats and	big hats, those palace gua	rds show absolutely no e	expression on their faces and are
(A) sanguine	(B) phlegmatic	(C) choleric	(D) melancholic
3. A/an questio	n is innocently curious, ra	ather than aimed to hurt	someone's feelings.
(A) stoic	(B) innocuous	(C) dilettante	(D) supercilious
	were injured when fire	through crowds a	t a party at an amusement park outside Taiwan's
capital Taipei.			
· · · • •	(B) packed	(C) dipped	(D) zipped
5.CYNICAL: WRY= PIT			
	(B) SORROWFUL		(D) LAX
6. Drug and alcohol			
(A) abstain	` '	(C) abstruse	(D) abuse
7. The hotel room is not b	•	* * *	
` '	(B) accelerate	` '	(D) accredit
8. Michael's mana	=		osses.
(A) actuate	(B) adjourn		(D) adulterate
9. The doctor gave the par	tient an injection to	_ the pain.	
(A) allergic	` '	(C) allocate	(D) align
10. The thirsty old man to	ook several quick swallow	s of beer and let out a lo	oud, satisfied
(A) belch	(B) belly	(C) belt	(D) balloon
11. The little boy presente	ed the queen with a large	of flowers.	
(A) bluff	(B) bond	(C) bouquet	(D) building
12. The death toll from la	st Thursday's catastrophic	cruise has risen	to over 100 as disaster teams continue the search fo
bodies in the river.			
(A) canon	(B) capsizing	(C) catfish	(D) clams
13. The negotiations reach	hed a when the rep	resentatives from Germa	any and Greece refused to make any concessions.
(A) damp	(B) dart	(C) deadlock	(D) die-tie
14. The candles were the	only decorations on the ca	ake that were not	
(A) edible	(B) effectual	(C) egoistic	(D) empirical
15. Thousands of a	are fleeing from the war-to	orn country.	
(A) flags	(B) fugitives	(C) full-scales	(D) full-stomachs
16. The decision of	f the judge won her the ad	lmiration of groups on b	oth sides of the issue.
(A) impartial	(B) impasse	(C) impassive	(D) impede
17. Professor Chen showe	ed a disregard for the	he objections from his st	tudents.
(A) lofty	(B) longevity	(C) loudly	(D) luster
18. Margaret is a schoolte	eacher who as a wa	itress on weekends.	
(A) monitors	(B) monologs	(C) monsters	(D) moonlights
19. David tends not to	with his colleagues.		
(A) sociable	(B) social	(C) socialize	(D) socially
20. A agreement is	an official agreement tha	t two people make befor	re they marry in which they state how much of each
other's property each	will receive if they divorce	ce or if one of them dies.	
(A) precancel	(B) prenuptial	(C) preoccupied	(D) preparation

21. They had with be	havior from their grandda	augnter which they would	i not have tolerated from anyone else.
(A) picked	(B) pinched	(C) pleased	(D) put up
22. If you are of som	ething or someone, you a	re cautious because you d	lo not know much about them and you believe
they may be dangerous.			
(A) warning	(B) wary	(C) weary	(D) worry
23. The South African	_ emerged from decades	of international isolation.	
(A) economic	(B) economically	(C) economics	(D) economy
24. I used to eat at any time.	, but now I have my meal	s at fixed	
(A) time	(B) times	(C) timing	(D) timings
25. Mr. Gordon smokes abo	ut 20 every day.		
(A) cigarettes	(B) sticks of cigarettes	(C) pieces of cigarette	(D) pieces of cigarettes
26. The guide will provide y	you with a lot of at	out the area.	
(A) inform	(B) informal	(C) information	(D) informations
27. My uncle is a farmer wh	no has about 150		
(A) head of cattle	(B) head of cattles	(C) heads of cattle	(D) heads of cattles
28. Ever since the illness I g	got tired very		
(A) ease	(B) easy	(C) uneasy	(D) easily
29 is counted sweete	est by those who never	·	
(A) Successful; success		(B) Succeed; success	
(C) Successfully; succeed	ed	(D) Success; succeed	
30. I recommend that John	a doctor.		
(A) see	(B) sees	(C) saw	(D) seen
	yntactically meaningful	l. You might need to conv	vert the word form (i.e. capitalization, tense,
shut up and with their doors crooked back who shut hims natural that the rain should be a she might have made parties as she had done in from "You needn't expect to will be people to talk to you what rooms you're to keep of about. (D) Instructional Scaffolding

V. Reading Comprehension (6%; 2% each)

When a mass of solid flammable material is heated it burns away slowly owing to the limited surface area exposed to the oxygen of the air. The energy produced is liberated gradually and harmlessly because it is dissipated as quickly as it is released. The result is quite different if the same mass of material is grounded to a fine powder and intimately mixed with air in the form of a dust cloud. In these conditions the surface area exposed to the air is very great and if ignition now occurs, the whole of the material will burn with great rapidity; the energy, which in the case of the mass was liberated gradually and harmlessly, is now released suddenly with the evolution of large quantities of heat and, as a rule, gaseous reaction products.

Although an intimate mixture of a flammable dust and air may burn with explosive violence, not all mixtures will do so. There is a range of concentrations of the dust and air within which the mixture can explode, but mixtures above or below this range cannot. The lowest concentration of dust capable of exploding is referred to as the lower explosive limit and the concentration above which an explosion will not take place as the upper explosive limit. The lower explosive limits of many materials have been measured. They vary from 10 grams per cubic metre to about 500 grams per cubic metre. For most practical purposes it may be assumed that 30 grams per cubic metre is the lower explosive limit for most flammable dusts. Though this may seem to be a very low concentration, in appearance a cloud of dust of such a concentration would resemble a very dense fog. The upper explosive limits are not well defined and have poor repeatability under laboratory test conditions. Since the upper explosive limit is of little practical importance, data for this parameter is rarely available. The most violent explosions are produced when the proportion of oxygen present is not far removed from that which will result in complete combustion. The range of the explosive concentrations of a dust cloud is not simply a function of the chemical composition of the dust; the limits vary with the size and shape of the particles in the dust cloud

The heat produced by the combustion of the dust particles in a dust explosion and any gases evolved will cause a rapid increase in pressure at the walls of the vessel containing the dust cloud. In factories it is the effect of this pressure wave on relatively weak items of plant and buildings which has caused the deaths and injuries to persons employed in handling materials giving rise to dust explosions. Further, since the pressure wave produced by the explosion can cause further dust which may have accumulated in the plant or on internal surfaces of buildings to be thrown into suspension in air, additional fuel can be fed to the flame and a disastrous secondary explosion may follow. Additional consequences following a dust explosion pressure wave are: the fires that may have been started by the dust flame; the implosion effect on the plant and buildings as the pressure within these rapidly returns to normal.

- 48. According to article, which of the following cases will be considered relatively harmless?
 - (A)When a mass of solid materials is grounded into a fine powder and intimately mixed with air in the form of dust cloud.
 - (B) When a mass of materials is released rapidly with ignition.
 - (C) When a mass of materials is dissipated with gaseous effect.
 - (D) When a mass of solid materials is heated gradually and slowly.
- 49. According to the article, what will be the primary factor that causes deaths and injuries when dust explosion takes place in factories?
 - (A) increase of pressure wave

(B) collapse of factory buildings

(C) lack of emergency aids

- (D) insufficiency of professional knowledge
- 50. What could be the best title for this article?
 - (A) How to Prevent Dust Explosions
 - (B) Dust Explosions—the Basics
 - (C) What We Have Learned from Dust Explosions
 - (D) A Tragic Incident Caused by Dust Explosions
